

Construction is scheduled to begin Oct. 5, 2009 on SW 18th St between SW 12th Ave and Dixie Hwy. Construction will begin at the El Rio canal in the westbound lane and will go west to SW 12th Ave. When the westbound side is complete they will move the eastbound lane .

This construction will consist of adding bike lanes to the existing roadway, sidewalks, some landscaping and irrigation and installation of a new waterline. The construction will be done in 2 block stretches in one direction. Each 2 block stretch will be closed from 9AM to 4PM each day and traffic will be detoured to the adjacent paralleling roadway where possible. In some locations it will be necessary to detour traffic to Camino Real when an adjacent roadway is not available.

This construction will be ongoing for the better part of one year. We request that all traffic avoid this area if at all possible. Gary Eagle will be overseeing this project for the City and he can be reached at 561-239-1283.
